

The Nuremberg Chronicle 1493: Transcriptions

„ [...] The Nuremberg Chronicle [...] is one of the most important and most beautiful books of the incunabula era. Both the Latin version [...] and the German version [...] were printed in the offices of Anton Koberger who owned one of Europe’s largest printing houses of the period. [...] Following medieval traditions, the author divides the history of mankind into seven ages: the first age extended from the creation to the deluge; the second from the deluge to the birth of Abraham, the third to the kingdom of David; the fourth covered the period [...] to the Babylonian Captivity; the fifth to the birth of Christ; the sixth [...] from the birth of Christ to the present; and the seventh dealt with the arrival of the Antichrist and the Last Judgment.”, (Bernstein, 2002, p. 1422).

Primarily influenced by Conrad Celtis (1459-1476), Martin Behaim (1459-1507), Johannes Müller (Regiomontanus, 1436-1476) and Johannes Werner (1468-1522), is the text mainly based on the *Supplementum Chronicarum* by Foresti (1492):

„ [...] collectors of incunabula have often been attracted by the magnificent illustrations [...] Brought to the general attention of English collectors in 1724 by Thomas Hearne [...] “, (Cushing Duniway, 1941, p. 17).
